

EXTERNAL OFF-THE-ROAD VALVE MOUNTED TPMS SENSOR

030440

TireCheck's External OTR Valve Mounted TPMS Sensor is mounted on the valve of the wheel. The off-the-road external tire valve fits large bore off-the-road tire valves to capture tire pressure without the need of demounting the tire.

Easy to mount and suitable for most wheel designs, the sensor measures tire pressure and ambient temperature, transmitting data every 120 seconds to a suitable receiver.
